

SFT

Excellent in aircraft service

We offer innovative services in aircraft cabin cleaning

For us, customer satisfaction and perfection have the highest priority. Thanks to our flexibility, we are able to successfully complete short-term orders with the highest quality. Openness and loyalty is very important for us.

Aircraft Disinfection

- Cold-fogging application
- fast, easy, effective and safe

SAE AMS1452 and Boeing D6-7127 certified products

Professional cleaning of all leather surfaces

- Touch up
- Conditioning & protection of leather

Boeing D6-7127 certified products

Textiles & Carpet deep cleaning

- Seat belt, Curtain & Pillow cleaning
- Protective Coating

SAE AMS 1630C certified products

Professional cabin cleaning

SAE AMS 1550B, AMS 1534 & AMS 1535 as well as Boeing D6-17487 and D6-7127 certified products

Efficient fiber protection through sealing

An aircraft carpet looks beautiful and is also very hard-wearing. In addition, it gives comfort and cosiness to your cabin. However, the disadvantage is that the carpet must be cleaned regularly to ensure a clean appearance and to maintain a hygienic indoor air quality.

With the help of SFT Surface Treatment, the fibers of the carpet can be sealed so that the dirt can no longer penetrate them. The seal does not cause any noticeable or visible change in the appearance, but you can easily clean the carpet afterwards. The specially developed process extends the lifespan of the fabric or carpet and is equally suitable for natural as well as synthetic materials.

Sealing with surface treatment not only increases the protection of the fiber; they treat your fabrics at the same time gentle care. The seal makes the fibers smooth. Because every single fiber is sealed, no continuous film is formed. How said, the protective coat is completely invisible, but the success is not: the textile can continue to breathe; Color, structure and quality are retained.
